Education

Najot Ta'lim - Frontend Development

August 2022 - January 2023

- Gained a strong foundation in HTML, CSS, SCSS, Bootstrap/MDBBootstrap, JavaScript, React, Redux, and Redux Toolkit through hands-on practice and project-based learning.
- Developed multiple mini projects simulating real-world scenarios to reinforce practical front-end development skills.
- Collaborated effectively in team-based coding projects at Najot Ta'lim, enhancing teamwork and communication abilities.
- Mentored peers and provided technical support to classmates, contributing to a collaborative and growth-oriented learning environment.

Alfraganus University - Computer Engineering (Full Time)

September 2024 - Present

- Explored **Prompt Engineering** and its applications in AI-assisted development.
- Solved **400+ algorithm and data structure problems** on **LeetCode** and **Codewars**, strengthening analytical and coding skills.
- Studied and applied core concepts of **algorithms, data structures, and optimization techniques**.
- Conducted **frontend development classes** for students, mentoring beginners in React, TypeScript, and modern web technologies.

Experience

Frontend Engineer | UnitDev (Contract)

April 2024 - Present

- unitdev.uz – A multilingual website developed for a programming education center focused on teaching children. This project helped me gain strong hands-on experience in frontend development.
- foragedialog.uz – A multilingual web platform dedicated to climate-resilient agriculture, developed using Next.js and TypeScript. Rebuilt the site from scratch, achieving a 91% SEO score and 90% Accessibility score. The platform is fully operational, actively used by the client, with content updated in real time.
- rtholdings.uz – Developed a fast, user-friendly corporate website for RT Holdings, designed to match the company's brand identity and optimized for performance. Achieved 83% Performance, 82% Accessibility, and a perfect 100% SEO score.
- shamsoquvmarkaz.uz – Developed a modern, multi-language educational website for Shams Educational Center, providing information about courses, achievements, and community. Implemented full multilingual support (Uzbek, Russian, English, Arabic) with RTL layout for Arabic. Delivered a responsive, user-friendly interface optimized for accessibility and performance.

Frontend Engineer | OKS Technologies (Internship)

February 2023 - July 2023

- Built an admin panel with Ant Design, customizing components, ensuring responsive layouts, and streamlining form workflows.
- Developed a responsive news website UI with Tailwind CSS, accelerating development and optimizing the CSS footprint.
- Implemented data fetching with React Query, including caching, retry logic, and custom hooks for category-based filtering, reducing redundant API calls.
- Managed global state and user authorization with Redux Toolkit, enabling persistent login, secure logout, and seamless global data access.
- Integrated Formik with Ant Design to deliver secure, validated, and simplified form handling.

Hard Skills

- Tools & Technologies: Firebase and Git/Github.
- Languages: JavaScript, TypeScript & C++
- Styles: MUI, Antd Design, Sass/Scss, Bootstrap/Mdbbootstrap, Materialize, Tailwind Css, Tailwind UI & Styled Component
- Frameworks & Libraries: React, NextJs, Redux, Redux-Toolkit, Tanstack-Query, Formik & Zustand

Activities

- Solved 50+ problems on [Leetcode](#) and 200+ challenges on Codewars.
- [Codewars Problems](#) & [Abdujalilov Ismoil](#) – Founder & Content Creator
- Created 20+ video tutorials on React.js for the [ITech](#) YouTube channel.
- Frontend Instructor at [UnitDev](#), [Najot Ta'lim](#) & [Alfraganus University](#).
